Amendments to the Claims:

In the Claims:

Please amend claims 1 and 15 and cancel claims 5-9 as indicated below. All pending

claims are reproduced below, including those that remain unchanged.

1. (Previously Presented A telecommunication infrastructure, comprising:

(a) a first electronic device, coupled to the telecommunication infrastructure;

(b) a second electronic device, coupled to the infrastructure, for providing a

conversation representation; and,

(c) a processing device, coupled to the telecommunication infrastructure and remote

to the first device for storing 1) a conversation element associated with the conversation

representation and 2) a software program for providing an audible utterance to the first electronic

device in response to a selected conversation representation;

wherein the conversation representation is text.

2. (Original) The telecommunication infrastructure of claim 1, wherein the second electronic

device generates an in-band signal in response to a conversation representation selection.

3. (Original) The telecommunication infrastructure of claim 1, wherein the second electronic

device generates an out-of-band signal in response to a conversation representation selection.

4. (Original) The telecommunication infrastructure of claim 2, wherein the signal is a Dual-Tone

Multi Frequency ("DTMF") signal.

Claims 5-9 (Cancelled)

- 10. (Original) The telecommunication infrastructure of claim 1, wherein the first electronic device and second electronic device are mobile telephones.
- 11. (Original) The telecommunication infrastructure of claim 1, wherein the processing device is a computer coupled to the internet.
- 12. (Original) The telecommunication infrastructure of claim 1, wherein the processing device is a relay between the first electronic device and the second electronic device.
- 13. (Original) The telecommunication infrastructure of claim 1, wherein the processing device provides the audible utterance in a conference call.
- 14. (Original) The telecommunication infrastructure of claim 1, wherein the telecommunication infrastructure includes a wireless telephony application.
- 15. (Previously Presented) A telecommunication infrastructure, comprising:
- (a) a first electronic device, coupled to the telecommunication infrastructure; and, a second electronic device, coupled to the infrastructure and remote to the first device for providing a conversation representation, and for storing 1) a conversation element associated with the conversation representation and 2) a software program for providing an audible

utterance to the first electronic device in response to a selected conversation representation;

wherein the conversation representation is text.
